MARISSA CURRY

marissacurry@berkeley.edu | 619-877-4964 | Berkeley, CA | LinkedIn | GitHub | marissacodes.com

SUMMARY

Backend engineer who ships products. Built C#/.NET microservices on AWS (Lambda, ECS, DynamoDB, S3) for Homes.com, serving millions of users. Co-founded and led engineering on Starcove, a Roblox social game selected for Roblox Jumpstart (60 of 2,000+ teams), and now building Starbot, a predictive diagnostics system for robot actuators. Range across Python, Lua, React, and 3D.

SKILLS

Languages: C#, .NET, Python, Lua, JavaScript, TypeScript, SQL, C++, Go, Rust

Frameworks & Cloud: AWS (Lambda, ECS, DynamoDB, S3), React, React Native, React Three Fiber, three.js, BigQuery

Tools: Git, GitHub, Jenkins, Postman, Cursor, Rojo, Roblox Studio, Jupyter, Visual Studio | Microsoft C# Foundations Certification

EXPERIENCE

Associate Software Engineer | CoStar Group (Homes.com) | *September 2024 – June 2026*

- Built C#/.NET microservices on AWS (Lambda, ECS, DynamoDB, S3) for Homes.com, serving millions of users
- Implemented timezone conversion for all Homes.com listing showing times using existing NuGet packages
- Maintained 90% unit and integration test coverage across automated test and deployment pipelines
- Cut tech debt user stories by 25% by closing stories on schedule

Co-Founder and Technical Lead | Starcove (Roblox social MMO) | *April 2026 – September 2026*

- Took a Y2K cozy social MMO from concept to MVP: farming, housing, fashion contests, bakery economy (Lua)
- Selected for Roblox Jumpstart 2026, one of 60 teams from 2,000+ applicants (mentorship, ad credits, co-marketing)
- Built backend services in Lua: data persistence, currency and progression, seven-tier ranking system
- Set up a Cursor → Rojo → Roblox Studio → GitHub pipeline for live sync and version-controlled collaboration
- Modeled, rigged, and animated 3D characters with Meshy AI and integrated them into gameplay
- Ran sprint planning and wrote user stories for a two-person engineering team

Co-Founder and Engineer | Design for Users | *January 2025 – Present*

- Co-founded an agency building SaaS apps, websites, and social strategy for small businesses and creators
- Shipped 5+ websites and apps in JavaScript, TypeScript, and React Native
- Built Hedge Wallet, a crypto wallet integrating the MoonPay API with a Jito API backend

- Grew audience reach 50–100% for multiple creators through social campaigns

INDEPENDENT PROJECTS

Starbot | Predictive actuator diagnostics for industrial and humanoid robots | *2026 – Present*

- Simulated a 28-actuator humanoid on a virtual CAN bus in Python
- Implemented fault injection and diagnostic trouble codes for actuator health monitoring
- Built an interactive three.js interface for inspecting actuator state and faults

3D Dollhouse Portfolio | marissacodes.com

- Built an interactive five-room 3D dollhouse with a walkable chibi character in React Three Fiber

EARLIER EXPERIENCE

Research Fellow, Data Science and Machine Learning | MIT | *June 2024 – August 2024*

- Completed a 12-week applied AI program with a business-focused capstone; 90% average across subjects
- Presented a thesis on real estate market cycles and cost disparities using Python and Jupyter

Investment Technology Intern | Wellington Management | *June 2023 – August 2023*

- Built a Python front end for visualizing financial variables and a tool to extract and summarize database data
- Built a heat map for a financial dashboard showing account health
- Served as scrum master; earned a $15,000 scholarship on completion

Software Engineering Intern | Cvent | *January 2022 – March 2022*

- Optimized front-end and back-end code on an Agile/Scrum team
- Ran regression tests and code reviews that surfaced recurring failures and informed cloud infrastructure fixes

EDUCATION

Master of Advanced Study in Engineering, Power & Autonomous Systems | UC Berkeley | *Expected Fall 2027*

B.S. Computer Science, GPA 3.5 | University of Maryland Global Campus | *August 2024*

AWARDS

- UC Berkeley MAS-E Departmental Scholarship (2025)
- Girls Who Code / J.P. Morgan Chase #TechForGood Build-a-thon, First Place (2022)
- 1517 Fund Grant (2022)
- NCWIT Aspirations in Computing Award (2018, 2019)

LEADERSHIP

- **Career Preparation Fellow, Management Leadership for Tomorrow:** 18-month leadership program for top BIPOC college talent
- **College Loop President, Girls Who Code:** led cross-university events and hackathons to expand

access to tech

- **Lead Teacher, AmeriCorps:** perfect teaching score; built a STEM outreach partnership with the Flathead Reservation
- **Founder, STEM tutoring practice:** taught K through graduate students in robotics, coding, math, and science
